BLU. DIGITAL

Outsourced In House

Outsource your talent Acquisition function for scaling businesses and team builds

Who is this ideal for?

Businesses with team-build requirements and who need a talent partner that understands specific disciplines within Digital Marketing, Ecommerce, Tech and Design. As a business, you may be time-poor and needing someone for a short-term project rather than investing in a long-term internal resource.

How we do it

Our talent partners work with your business and embed themselves into your company to source great talent at scale, and for various projects. We have various models to meet your needs with our most popular options being a monthly subscription model or Retainer model, which gives you access to a full tech recruitment suite.

This includes our video interviewing service, recruitment brand management, access to our full advertising suite, extensive databases, fully seo optimised digitally focused sites to assist with candidate attraction and social media channels, which is the perfect solution for startups and SME's who need excellent resources to build a great team. You also may be a large corporation planning restructures and Digital Transformations, or even building an in-house agency. We can help with all of these changes to your organisation.

Key Services

Control your costs and hire for multiple roles at any time

Support for under resourced talent teams

Hire at Scale on a monthly retainer with no additional costs

Dedicated member of the Blu Digital team to work onsite with the business
